

## ERRATUM

**Les Aderidae de la faune de France (Coleoptera).**  
*Annales de la Société entomologique de France*, 38 (3) :  
 211-238.

Dans l'article de N. Gompel & E. Barrau, la figure 67 et sa légende sont erronées. Une version antérieure a pris la place de la figure définitive et les taxons *Ganascomorphus*, *Ganascomorphus convexus* et *Moraguesia* n'ont jamais été décrits et n'existent pas. Cette figure devra être remplacée par la figure suivante :

- ▲ *Vanonus brevicornis* (Perris, 1869)
- *Pseudanidorus pentatomus* (Thomson, 1864)
- ? *Pseudanidorus laescollis* (Falmalre, 1883)
- ◆ *Cnopus minor* (Baudi, 1877)

## ERRATUM

**The Epicopeiidae: phylogeny and a redefinition, with the description of new taxa (Lepidoptera: Drepanoidea).** *Annales de la Société entomologique de France*, 38 (4): 463-487.

A few misprints should be rectified in my recently published paper (J. Minet 2003) about the Epicopeiidae, a small Asian family now composed of nine genera.

On page 465 (*oculo-facial index*), the colon before “interocular distance” corresponds to a ratio. Then a space should have been left between this colon and “vertical eye diameter”.

In the legend to figs. 30-31, the dash following “28” and the two signs following “29” must be replaced, respectively, by a short wavy line and an asterisk.

In the bibliographical list, after “HERING M. 1932” (p. 486), “FORBES W.T.M.” and “HESSEL J.H.” have been mistakenly substituted for, respectively, “HESSEL J.H.” and “HOLLOWAY J.D.”. Actually the four references between “HERING M.” and “INOUE H.” should read as follows:

- HESSEL J.H. 1966 – A preliminary comparative anatomical study of the mesothoracic aorta of the Lepidoptera. – *Annals of the entomological Society of America*, **59**: 1217-1227.
- HESSEL J.H. 1969 – The comparative morphology of the dorsal vessel and accessory structures of the Lepidoptera and its phylogenetic implications. – *Annals of the entomological Society of America*, **62**: 353-370.
- HOLLOWAY J.D. 1998 – The moths of Borneo [part 8]: families Castniidae, Callidulidae, Drepanidae and Uraniidae. – *The Malayan Nature Journal*, **52**: 1-155 + 58 pls.
- HOLLOWAY J.D., BRADLEY J.D., CARTER D.J. 1987 – Lepidoptera. In: Betts C.R. (ed.), *CIE guides to insects of importance to man*, **1**: [i-iv], 1-262. London: CAB International Institute of Entomology & British Museum (Natural History).
